See which games are available for PC at the site and download a game for free.Q: c# equivalent to perl's system "ps" If I have some perl command line that I need to execute using a.net program, for example the following perl command will delete files older than 7 days pwd find. -name "*.txt" -type f -mtime +7 -print ! xargs -I {} rm -rf {} And I'm wondering if there is a.net commandline or.net class that is equivalent to pwd and find? I found the Process class, but I don't think it's the same. A: I think the System.Diagnostics.Process class you found is a good start. Using it is pretty simple: // create a Process Process pr = new Process(); // get the path to the executable from the command line pr.StartInfo.FileName = System.Environment.GetCommandLineArgs()[0]; // Set our command line arguments pr.StartInfo.Arguments = System.Environment.GetCommandLineArgs()[1]; // Start it pr.Start(); // Wait for it to finish pr.WaitForExit(); 2d92ce491b
